

DepotIQ

BY NAVRIX SOLUTIONS

DEPOTIQ.CO.ZA

● LIVE FROM 3 AUGUST 2026

● PROUDLY SOUTH AFRICAN · BUILT FOR LOCAL HIRE COMPANIES

Run your whole hire business from **one screen.**

Quotes, hires, repairs, sales and invoices — all in one place. **Built in South Africa, for South African tool, plant and equipment hire companies.** No spreadsheets. No paperwork chaos. No imported software that doesn't understand how you work.

Works on your phone

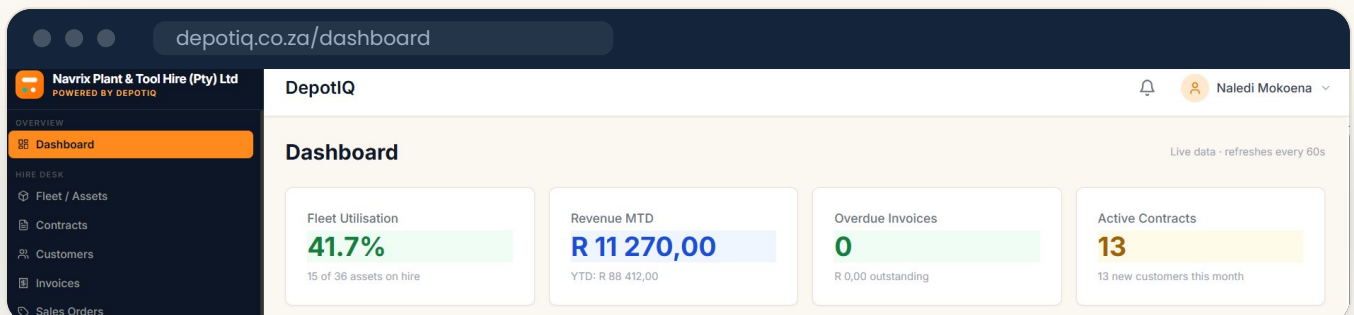

Get paid faster

Stay compliant, effortlessly

● Everything that matters, on one dashboard

WHAT YOU GET

Everything that matters, in one place.

One system for the whole hire business — from the first phone call to the final invoice. No more jumping between a spreadsheet, a diary, an accounting package and a pile of paper job cards.

See your whole yard at a glance

Every machine, where it is and what it's earning — one live view of your entire fleet and what's out on hire right now.

Quote while they're on the phone

Build a clean, professional quote in seconds and turn a yes into a confirmed hire on the spot — no callbacks, no lost deals.

Photo every machine, in and out

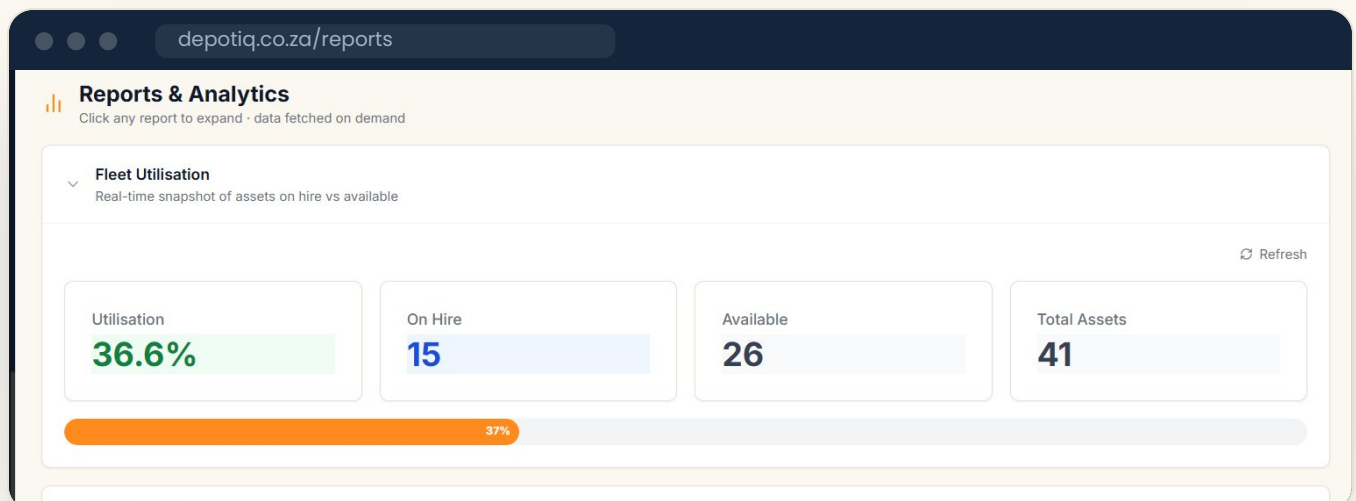

Condition captured on dispatch and return, so the arguments over who broke what end before they start — and the charge is raised for you.

Know exactly what you're owed

A live view of overdue accounts and outstanding invoices — with reminders that chase the money so you don't have to.

● Your numbers, live — reporting built in

Utilisation, revenue, overdue accounts, top customers and more — **every report a click away**, with CSV export for your accountant.

Built around how a hire company actually works.

AT THE FRONT DESK

Quotes in seconds

Send a smart, professional quote while the customer's still on the line — turn a yes into a hire in one click.

Live availability

See what's in the yard and what's out, right now. Never promise a machine you don't have or double-book again.

Fast counter hire & sales

Walk-in customer? Put a tool on hire or ring up a sale of blades, oil or spares — your stock count updates itself.

ON SITE & IN THE WORKSHOP

Drivers run on their phone

Give every driver a free login to see the day's deliveries and collections and mark each one done from the road — straight from their own phone.

Damage-proof returns

Every machine photographed going out and coming back. No more arguments over who broke what — damage charges raised automatically.

Repairs, service & safety

Track every repair drop-off to done, with safety checks built in — and get flagged before a certificate expires on you.

MONEY & CONTROL

Get paid faster

Send a payment link — card or EFT — and watch the money land. Overdue accounts get chased automatically.

One-click VAT invoices

Turn any hire or sale into a proper 15% VAT invoice or statement instantly — branded as your business.

Compliance, handled

Safety checks, customer consent and the right paperwork happen as part of the job — so you're always on the right side of the rules.

NEW

Source stock & sub-hire — without leaving DepotIQ

Short on a machine? See what other suppliers — **DepotIQ businesses and competitors** — are charging, with their contact details, and raise a purchase-order enquiry in one click. Publish your own rates too, and put your yard in front of every other hire company on the platform.

SIMPLE PRICING

One price per user. Everything included.

Pay per user, per month — and add as many drivers as you like, free. You only pay for office and counter staff. Go month-to-month, or book annually and save 10% on Standard.

STANDARD

R499

per user / month

or R449/user-mo on annual billing — save 10%

FOUNDING · FIRST CUSTOMERS

Enquiries: admin@depotiq.co.za

*Founding pricing is for our first customers and is locked for 3 years · subject to Ts & Cs. Standard saves 10% on annual billing; founding pricing is already discounted, so the 10% does not stack. Prices shown per user / month, excluding VAT. 2-user minimum; drivers are free and unlimited. DepotIQ runs in any modern browser on phone, tablet or computer — a dedicated native mobile app is in development and will follow after launch.
